Step by Step Guide

Step 1- Completing the Application

The application must be signed and dated by the registered owner(s) and submitted with all supporting documentation (as listed on page 3 of the application).

Step 2- Property Inspection

If you are deemed eligible based on the program guidelines, a home inspection will be arranged by TBDSSAB. The Program Technical Advisor (PTA) will contact you to arrange the date and time of inspection. The PTA will complete a work description outlining eligible and mandatory repairs that can be completed under the program guidelines.

Step 3- Obtaining Quotes

TBDSSAB will provide you with copies of the **Work Description Report** that you **must** use to obtain a minimum of 3 quotes from 3 separate contractors. Contractors must not be a relative and must have an HST/Business Number.

1. Consult the Yellow Pages and/or contact your local Better Business Bureau to advise you on the reputation of the contractor.
2. Contact your local Canadian Home Builders Association who may be able to provide the names of members who do repairs.
3. Review Canada Mortgage and Housing Corporation's web site for additional information on hiring a contractor.

Step 4- Signing the Agreement

A representative from TBDSSAB will review all the quotes with you. Based on the work to be completed by the selected contractor(s) a loan security document will be prepared. A mortgage will be registered against the property which includes the costs of repairs, permits, program technical advisor fees and administration costs.

Remember, before any construction contract can be signed and work started, you must wait until you receive written notification from TBDSSAB that your loan is approved.

Step 5- Final Approval

When you receive your approval letter, you **must** call the contractor to start the work. It is important that you enter into a contract with the contractor to cover all the key points relating to the repair work outlined in the Work Description Report, and should include both a start and completion date. Repairs must start within 120 days from signing the security document and be completed within (6) six months from that date. It is the homeowner's responsibility to check with local building authorities to ensure they obtain the required permits for repairs being completed. This is your assurance that municipal standards will be met as work will be required to be inspected.

NOTE: You will be signing the contract to have the work done, therefore it is your responsibility to see that the contractor adheres to the terms and conditions outlined in the contract. The relationship is between the homeowner and the contractor. TBDSSAB does not resolve any disputes between the homeowner and the contractor and only acts as the program administrator. Do not sign the contract before you have received your written approval.

Step 6- Once the Repair Work Begins

Homeowners must monitor the work as it is being completed. As the repairs are completed the contractor will submit invoices to the homeowner. In turn original invoices are to be submitted to TBDSSAB. The PTA will be contacted by TBDSSAB to arrange for an inspection to complete an inspection report for the homeowner to sign, approve payment and acceptance of work completed. The PTA will be checking to ensure the work meets local building codes and TBDSSAB's other specifications. For some types of repairs (for example, plumbing, electrical) where a provincial or municipal permit is required, an inspection from the governing agency will be required. Cheques will be issued by TBDSSAB and made payable to and mailed to the contractor.

Note: If the contractor encounters unforeseen repairs and additional work will be required at a cost to the homeowner, the work must stop and the homeowner must notify TBDSSAB and approval must be granted before proceeding.

Step 7 - After the Repair Work is Complete

Upon completion of the repairs, you will receive a forgiveness schedule to reflect the actual costs of your project. A mortgage will be placed on your home in the amount of the actual project costs for the duration of the forgiveness period. You will now want to keep your home in good condition. Proper maintenance will not only save you money in the long run, it will also keep your home safe and comfortable for all who live in it. If you are not sure about what will help, get some tips from home maintenance books or from your local building supply center or go to CMHC home renovations. These centers and publications offer tips for doing repairs to your home and day to day maintenance. Your home and your family are worth the extra care.
